Conforming and High-cost area limits.

The conforming loan limit is set by The Housing and Economic Recovery Act and designated by the county. The FHFA bases each year’s restrictions on their House Price Index report. Most counties will be assigned the national baseline limit, which reflects the change in the average U.S. home price.

The Federal Housing Finance Agency (FHFA) publishes annual conforming loan limits that apply to all conventional mortgages delivered to Fannie Mae or Freddie Mac. These include general and high-cost area loan limits; high-cost areas vary by geographic location. IDB Global Federal Credit Union will follow the conforming and high-cost area limits for the loans that can be sold/deliver in the second market to the GSEs.

We can find the current conforming loan limits with the following link to the FHFA:
